Customised products, installation, maintenance, financing and more.

Individual customer focus and flexibility

Meeting all your organisation's specific drinking water needs.

A focus on health and wellbeing

Water dispensers encourage hydration, helping people feel - and perform - at their best.

Outstanding water filtration, created by BRITA

In the business of smarter drinking water choices since 1966.

Contact us today and let's talk about your BRITA water dispenser solution | www.brita.net

Passionate about water, passionate about you

Enabling organisations like yours to enjoy smarter water choices has been our family business since 1966.

Water is our source of life, our everything. With this belief, Heinz Hankammer founded the company in Taunusstein, Germany, in 1966. The fascination for water continued under his son Markus Hankammer and guides our actions to this day.

Today, BRITA offers professional filtration solutions and mains-fed dispensers in addition to consumer products. Every day, over 95,000 BRITA water dispensers serve more than 2.5 million people in workplaces worldwide. These range from famous car manufacturers, to leading hospitality chains, to tech companies in Silicon Valley.

When it comes to smart drinking water choices, we know a thing or two. We combine over 50 years' experience with a broad product portfolio and corresponding services. So, you're sure to find just the right solution for you.

German technologies - worldwide applications

BRITA is a global brand, with products sold in 70 countries on all five continents. BRITA dispensers are made in Germany and Italy, and are available in 57 countries, including in EMEA, Australia and North America. What's more, we offer customers dedicated international key account management.

Made-in- Europe quality

Our family business draws on over 50 years' experience to design and build our pioneering products. We develop and make filters in Germany, our dispensers in Italy. We engineer and manufacture our products ourselves. This means we can ensure exceptionally high quality, and scale production in line with demand.

Our manufacturing plants - including one opened in 2018 - work with maximum energy efficiency through use of advanced technology.

BRITA staff are skilled and dedicated. They complete many tasks by hand, so a high degree of craftsmanship goes into each dispenser. But the latest technology also belongs to our working tools. For example, ergonomic lifting aids and tablets that display instructions. Hololens headsets help workers in Italy quickly resolve any issues. They direct questions straight to the headquarters team and get answers back in real time.

A closer look at the dispenser lifecycle

1. Purchase of materials and pre-production

More than 70% of our product components come from European suppliers, reducing their overall carbon footprint

2. Transport

We lower emissions from product transport through smarter purchasing decisions which minimise transport distances

Our water dispensers produce 86 % lower carbon emissions* than bottled water and 64% less* carbon than bottled water dispensers

3. Production at BRITA

We use certified green electricity at our European production sites in Germany and the UK. So, most of our indirect energy needs are met by renewable sources

5. Customer use

BRITA products help our customers to cut costs, waste and carbon emissions associated with single-use plastic bottles

4. Packaging

We've replaced the bubble wrap and foam packaging of spare parts with eco-friendly paper alternatives and only use cartons made from 80% recycled materials

6. Disposal

When our water dispensers reach the end of their long lifetime, the dispenser system is shredded, and the raw materials recycled responsibly

*Calculation based on Top Pro (medium cooling capacity)

Lower costs for you and the planet

Are sustainable solutions more costly? Not necessarily. With a BRITA water dispenser, your business can minimise its carbon footprint, reduce waste and save money too.

We channel over half a century's expertise into our filtration and treatment technologies. These remove unwanted substances such as microplastics and chlorine, while keeping valuable minerals. The result? Excellent water that meets the highest hygiene, quality and environmental standards - and delights the tastebuds.

What's more, our dispensers have a long lifetime. The replaceable components and filtration technology help safeguard the dispenser against breakdown. All BRITA dispenser filters are manufactured in Germany and the dispenser itself is assembled in our own production facility in Italy. So, you can be sure of made-in-Europe quality. We're happy to help you work out how much your business could save - simply contact us for details.

Hospitals and other healthcare

H₂O: the formula for good health.

Water in hospitals and other healthcare settings must meet particularly stringent standards.

You know that robust hygiene is key to minimising infection. At the same time, cost-efficiency is important. And hydration is essential to well-being – especially in

healthcare, where swift patient recovery and recuperation is critical.

BRITA water dispensers give you the answer to these many challenges. Your patients, visitors and staff can all enjoy filtered water free of charge. Either self-served or brought to them in bottles. It's reliable, refreshing,

tasty and – thanks to BRITA HygienePlus – hygienic and safe.

You can trust our wide experience of water dispensers in healthcare environments. What's more, you can choose from various options, such as disposable or reusable bottles, to fit your specific hygiene rules.

Filtration power for your needs

With BRITA's proven filtration solutions, you can be sure of excellent water – meeting the highest hygiene, quality and environmental standards.

Activated carbon

Reduces substances that impair taste and odour.

Ion exchanger

Reduces limescale and metals, e.g. lead.

Membrane

Filters out bacteria and cysts

Whatever the composition of the local mains water at your organisation, you'll find an effective filtration solution at BRITA. From activated carbon to ion-exchange resins, pre-filters, post-filters, double-layer and hollow fibre membranes, we have over half a century's expertise built into each of our BRITA filtration and treatment solutions, and our BRITA water dispensers.

With BRITA, you can be sure of Made-in-Europe quality. All our filters are manufactured in Germany, and BRITA water dispensers are assembled in our production facility in Italy. We take care to produce sustainably wherever possible. For example, we use coconut shells for our activated carbon.

You can be sure of excellent water – meeting the highest hygiene, quality and environmental standards as well as delighting the tastebuds – with proven filtration solutions from BRITA.

Excellent, proven hygiene and cleanliness

You can depend on the built-in safeguards that keep your BRITA water dispenser squeaky-clean and hygienic. These work to remove bacteria, microbial cysts and refreshing filtered water. We also offer a proven portfolio of tailor-made cleaning products for BRITA dispensers.

BRITA water dispensers are made in Europe and have served in the most hygiene-sensitive environments, including hospitals, for over 20 years. Today, over European 1,000 clinics and medical facilities rely on BRITA water dispensers.

Our CLARITY Protect filter sets the hygiene standard for water dispensers. The vital first filtration stage is boosted by a bacteria-purging hollow fibre membrane for impeccably clean water in every glass.

Our dispensers' BRITA ThermalGate™ feature heats the tap to protect against contamination from external sources. This feature is one of three safeguards in the BRITA HygienePlus solution, in addition to two unique BRITA filtration solutions. This solution, developed through our years of experience in the healthcare market, provides outstanding hygiene.

The BRITA HygienePlus solution complies with stringent food hygiene standards and the microbiological specifications of the German Drinking Water Ordinance. The cleanliness of BRITA dispenser and filter solutions has also been certified by independent institutes.

End-to-end hygiene, benchmark filtration and outstanding cleanliness

From consultation and purchase through operation to after-sales support, we're with you every step of the way.

Hygiene at the production site

Your BRITA water dispenser begins life in our hygiene-certified facility in Italy. And it starts as it means to go on. Assembly is gloves-only and contamination-free with random critical component batch testing and regular hygiene training for production personnel. Dispensers are 100% microbiologically checked. When approved and ready, all surfaces of every dispenser are cleaned and disinfected ready for delivery.

Hygiene at your organisation's location

Our service technicians follow strict safety procedures when handling and installing your dispenser. The system is chemically cleaned inside and out during fitting. Chemical cleaning of the dispenser by BRITA service personnel is part of the regular maintenance schedule. This ensures seamless functionality and operational quality.

Regular cleaning on-site

Regular cleaning of your dispenser's external surfaces is an indispensable part of hygienic practice. To prevent on-site contamination, we provide operators with detailed information on cleaning the individual components and on the best cleaning agents to use.

Hygiene built-in

Our BRITA water dispensers come with hygiene functions built in. ThermalGate™ protects continuously against retrograde contamination. So, it's working to provide protection during rest periods, such as nights or weekends, as well as at peak times. No manual effort or use of chemicals is needed. Our BRITA HygienePlus solution combines three effective protection devices. This industry-leading concept provides an outstanding level of hygiene for demanding healthcare environments.

BRITA ThermalGate™

Hygiene feature: The powerful thermal disinfection solution from BRITA.

The tap of a typical water dispenser is exposed. A sneeze or touch of a hand can introduce germs. Without a robust safeguard, microorganisms on the wet tap can go on to contaminate the dispenser. That's why our BRITA water dispensers include our ThermalGate™ feature. This regularly heats the tap to protect against contamination automatically. You can sit back and relax – knowing your water dispenser has a proactive, powerful defence against germs, tested by an independent laboratory (Ruhr District Institute of Hygiene).

**applies to BRITA Top Pro

BRITA ThermalGate™

Hygiene feature: The powerful thermal disinfection solution from BRITA.

The tap is automatically heated to over 125°C at regular intervals for thermal disinfection.

ThermalGate™ is continuously active,
providing protection not only at peak
times, but also during periods of inactivity
e.g., at night or on weekends

Does not require manual
effort or chemical additives

Developed through over 20 years'
experience in the healthcare market

BRITA HygienePlus

This industry benchmark delivers the outstanding degree of protection demanded by hygiene-sensitive environments. We've developed it through over 20 years' experience working in the healthcare sector. An excellent filtration performance reduces potentially health-affecting bacteria, microbial cysts, microplastics, pharmaceuticals, legionella, and E. coli.

The BRITA HygienePlus solution consists of three safeguards, plus smart digital monitoring for additional safety. From the moment you draw water, our multi-stage filtration system is working together with smart monitoring. You can depend on fresh-filtered, hygienically pristine, crystal-clear water to quench thirst, every time.

BRITA HygienePlus has been tested in numerous studies at hygiene institutes, including the University Medical Centre of Johannes Gutenberg University Mainz, confirming microbiological safety to exacting DVGW standards.

**applies to BRITA Top Pro

BRITA HygienePlus

An industry benchmark hygiene feature.

- The first safeguard is the BRITA CLARITY Protect filter at the inlet. This includes a pre-filter to remove coarser particles, activated carbon filtration to reduce substances that impair taste and odour, and hollow fibre membrane filters to reduce pharmaceuticals, organic impurities and metals such as lead. The hollow fibre membrane filters out 99.999% of bacteria (including E. coli and Legionella) and 99.95% of cysts
- Next up is the BRITA CLARITY Safe X3. This filter – located directly upstream of the dispenser tap – is a very fine, asymmetrical double-layer membrane that removes any potentially remaining bacteria and microbial cysts just before the water is drawn. The double-layer membrane filters out microplastics, 99.99999% of bacteria (including Pseudomonas aeruginosa) and 99.95% of cysts
- Finally, BRITA's powerful ThermalGate™ feature regularly heats the dispenser outlet tap automatically. This shields against contamination from external sources, such as touching the tap and aerosol droplets from sneezing or coughing

Our accessories

Find the match for your dispenser.

BRITA products don't stop with water dispensers and filters. We offer a comprehensive range of accessories to cover all your drinking water needs from dispensing to serving to cleaning.

Our premium quality bottles are easily refilled via our dispensers. They're customisable, too. Full or empty, they can be stored in crates specially designed for the various bottle types. As hygiene is a top priority, we supply everything you need to sanitise your BRITA dispenser and clean BRITA bottles. We offer a choice of bottle washing trays, compatible with professional and domestic dishwashers.

Our best-practice tip? We recommend cleaning your BRITA dispenser daily for extra peace of mind.

Looking for ways to reduce your carbon footprint?

Replacing plastic bottles with long-lasting BRITA bottles and corresponding accessories is an easy way to make a difference.

We're here for you

Throughout the dispenser lifecycle.

Safety through maintenance

Regular, thorough maintenance is essential for first-rate hygiene. We service our dispensers 1-2 times a year as standard. And with our BRITA Dispenser iQ Connect App we will ensure a higher service quality due to clear dispenser data analysis. Our rental and full-service contracts cover any repairs made during the dispenser's guarantee period (5-10 years).

Reliably high service quality

Our employees are audited regularly. A supervisor will visit you, make sure you're satisfied and confirm our service engineer has done a good job. We give our staff top marks – but it's good to know customers agree! Our training programmes ensure our service quality gets better and better.

Advice and more – on tap!

Our service engineers and customer service agents work hard to make sure you're completely satisfied. We can answer any questions you have during on-site visits or via our dedicated hotlines.
